

DoD Space Planning Criteria for Health Facilities

Ophthalmology/Optometry Clinic

3.13.1. PURPOSE AND SCOPE:

This section specifies the space planning criteria for outpatient ophthalmology and optometry clinics.

3.13.2. DEFINITIONS:

Full-Time Equivalent (FTE): A work force equivalent to one individual working full time for a specific period, which may be made up of several part-time individuals or one full-time individual. This will include everyone working in the facility; military, civilian and contractor personnel.

Laser Eye Center: A service that is approved, staffed and equipped to correct vision (i.e. nearsightedness, farsightedness and astigmatism) via surgical procedures, often using lasers (Laser in Situ Keratomileusis [LASIK], Photo Refractive Keratectomy [PRK], Photo Therapeutic Keratectomy [PTK], Radial Keratectomy [RK], or Automated Lamellar Keratectomy [ALK]).

Office: Room Code OFA01 is a private office outfitted with standard office furniture. Room Code OFA02 is a private office outfitted with systems furniture. Room Code OFA03 is a cubicle outfitted with systems furniture.

Ophthalmology Services: Ophthalmology services are rendered by a physician who provides care dealing with the structure, functions and diseases of the eye, the performing of certain surgical procedures; and the counseling of patients regarding their surgical alternatives and vision needs as related to their occupations, avocations and lifestyle.

Optometry Services: These services are provided by an optometrist who provides comprehensive eye health and vision examinations; diagnosis and treatment of eye diseases and vision disorders, the detection of general health problems; the prescribing of glasses, contact lenses, low vision rehabilitation, vision therapy, and medications; the performing of certain surgical procedures; and the counseling of patients regarding their treatment alternatives and vision needs as related to their occupations, avocations and lifestyle.

Preceptor/Consult Room: A location is required for residents in training to be able to discuss cases in private with supervising faculty physicians (preceptors). These discussions occur during the course of a patient visit, requiring proximity to exam room areas. In clinic configurations with staff physician offices clustered near exam rooms, precepting may be feasible from the faculty physician's own office and not from a dedicated central preceptor room. Note that any space provided for precepting must afford privacy from eavesdropping patients and passers-by ... hence an open area accessible by non-staff is NOT acceptable.

Provider: An individual who examines, diagnoses, treats, prescribes medication and manages the care of patients within his/her scope of practice as established by the governing body of a healthcare organization. Providers are physicians, physician's assistants and clinical nurse practitioners. The term 'staff providers' does not include residents.

3.13.3. POLICIES:

Each FTE provider is entitled to a maximum of one office and two eye lanes. The eye lanes may be any combination of any of the rooms listed in paragraph 3.13.5 below (i.e. full length eye lanes or folded eye lanes). The combination shall be determined at each facility, but the total number of eye lanes may not exceed two. The provider's office space may either be part of a combined office/eye lane or it may be a separate office.
